

IN THE SUPREME COURT OF IOWA

PUBLIC NOTICE

**REVISIONS TO
ELECTRONIC DOCUMENT MANAGEMENT
SYSTEM PROPOSED RULES**

After careful consideration of public comments submitted to the supreme court in writing and during oral presentations, the supreme court revised its proposed rules of practice and procedure relating to the use of an electronic document management system (EDMS) which will enable electronic filing and the use of electronic files in the Iowa courts. This proposal, as revised, will eventually be the final version of these rules subject only to modifications that may be necessary to conform the rules to any technical requirements that may arise during the system's development, which is yet to begin. The court intends to issue an order approving the final version of these rules prior to implementation of the electronic document management system in Plymouth County, the first of two pilot counties selected to test electronic filing and paperless procedures.

Dated this 10th day of June, 2008.

THE SUPREME COURT OF IOWA
